1495 S 33rd Street
West Des Moines
Iowa 50265

sirasasitorn@gmail.com | 847-648-0236 | sirasasitorn.com

Technologist with a background in **data engineering**, **analytics**, and **AI integration**, currently leading a creative agency where I bridge technical execution with creative strategy. Experienced in building data infrastructure and developing intelligent systems that streamline operations, improve workflows, and power client solutions. Design and implement custom tools and analytics platforms that solve real business problems with measurable impact.

PROFESSIONAL EXPERIENCES

Engineering Team Lead

Turfmap, Thailand
JUL 2023 – Present

- Lead technical architecture and hands-on development of data pipelines, AI systems, and internal tooling while managing a cross-functional engineering team, ensuring technical delivery aligns with business objectives.
- Built and orchestrated end-to-end data pipelines using Python for scraping and ingestion, Airflow for orchestration, and dbt for data modeling and testing, leading to KPI-ready dashboards and reliable analytics for market research, SEO, and social media performances.
- Architected and implemented RAG-based AI systems using LlamaIndex and pgvector (PostgreSQL), achieving 90% retrieval accuracy; fine-tuned Llama-2-7B models on proprietary datasets to improve content relevance by ~80%.
- Automated marketing workflows by integrating AI tools with proprietary datasets, including content planning, multilingual captions, image/video generation via fine-tuned APIs, and file organization pipelines, reducing campaign execution time by 80% and ensuring error-free client delivery.
- Engineered client-facing platforms using Django/Wagtail with integrated Google Analytics and Tag Manager for conversion tracking, supporting 610K annual unique users with 30% engagement rates.

Data Analytics Engineer

Arity, Chicago
JAN 2020 – JUL 2023

- Built and optimized Spark-based pipelines on AWS (S3, EMR) for both batch and streaming data (Kafka, Flink, NiFi), processing 40M+ records daily across 160GB of data, reducing pipeline latency and improving reliability.
- Collaborated with Data Scientists to integrate models into production Scala data pipeline, serving around 120M route predictions daily.
- Created migration pipelines to restructure existing data storage (partitions, aggregations, schema updates), improving efficiency and scalability of downstream processing.
- Implemented automated data governance by building pipelines to remove PII data, processing over ~10M records daily, and ensuring compliance with CCPA/HIPAA, with zero violations during tenure.

Business Analytics Senior Consultant

Arity, Chicago
JAN 2017 – JAN 2020

- Designed and built monitoring dashboards using SQL, Python, and Tableau with data from HDFS, Oracle, and AWS S3, tracking millions of records daily to detect anomalies during migrations and SDK releases.
- Partnered with leadership, engineering, and data science teams to investigate ~5-10 anomalies per release cycle, reducing risks to downstream analytics and ensuring reliable data delivery.
- Led ongoing data quality control initiatives, delivering weekly reports across 10+ systems that improved visibility and enabled timely corrective actions.

Earlier Roles

- Information Analyst Senior Consultant, Allstate Corp (2015–2017)
- Service Engineer Consultant, Allstate Corp (2014–2015)
- Product Analyst, Allstate NE Corp (2013–2014)
- Information Analyst, Allstate Corp (2012–2013)
- Business Analyst Intern, McDonald's Corp (2011–2011)

EDUCATION

Bachelor of Science in Operations & Information Management

Northern Illinois University

August 2008 – May 2012, DeKalb, IL

Major & Minor Emphasis: Information Systems & Computer Science

SKILLS & PROFICIENCIES

AI Integration

- LLM fine-tuning (Llama-2), RAG implementation with LlamaIndex
- Vector search with pgvector (PostgreSQL), prompt engineering, workflow automation
- AI integration across analytics and content workflows

Data Engineering & Big Data

- Python, Scala, SQL, dbt, Airflow, NiFi, Spark (batch + streaming), Kafka, Flink
- AWS (S3, EMR), Hadoop, PostgreSQL
- Data governance and quality

Business Analytics

- Tableau, Jupyter Notebooks, Google Analytics
- Dashboard development, KPI design, data profiling, and reporting automation

DevOps, Tools & Orchestration

- Git, Jenkins, Shell scripting, Docker
- CI/CD pipelines, containerization, workflow orchestration, and monitoring

Creative & Applied Technology

- Media production, web design with AI-assisted workflows, and social analytics for campaigns
- Bridging creative strategy with data-driven insights for marketing and experiential design

Leadership & Management

- Technical architecture, project management, stakeholder communication, and cross-functional team leadership
- Strategic planning, roadmap development, and delivery alignment

LANGUAGES

- American English (Native)
- Thai (Native)
